A B O U T M E

Brylian Foronda, is a self-motivated individual driven by the rate of change in technology; passionate about the new ideas, new solutions, and the new opportunities it presents. He is constantly looking for ways to challenge himself and places great effort to excel in what he does. He is an innovative IT professional who enjoys implementing new server, network, and security technologies, as well as redundant systems to maximize business continuity and efficiency. He is also an experienced programmer specializing in both front-end and back-end development to provide asynchronous next-generation web applications for end users.

E X P E R I E N C E

IT MANAGER

Kā'anapali Beach Hotel / Lāhāina, HI / 2013 - Present

The information technology compass of Hawai'i's most Hawaiian Hotel; delivering short-term and long-term visions for the company's technology needs and goal.

- Implements and administers redundant/highly available systems, disaster recovery and back-up procedures, and information security control structures to maximize business up-time and prevent data loss.
- Designs, optimizes, and secures both physical and virtual network infrastructure.
- Plans, designs, manages, installs, troubleshoots, and repairs enterprise software, hardware and network systems and technologies.
- Develops plans, standard operating procedures, and documentations for IT hardware and software installation, upgrade, maintenance, and compliance.
- Undertakes numerous IT projects simultaneously; organizes and follows strict scheduling to ensure projects are completed in a timely manner.

WEB APPLICATION DEVELOPER

Research Corporation at the University of Hawaii / Remotely / 2012 - Present

The intelligent and pragmatic programmer; providing full-stack (front-end and back-end) web application development in Microsoft ASP.NET framework.

- Designs, implements, and manages numerous responsive web applications and relational databases for the Hawai'i Invasive Species Council.
- Optimizes applications for maximum speed and scalability utilizing client-side scripting and LINQ to SQL compiled queries.
- Develops, designs, and improves product user interface and functionalities to enhance end user experience.
- Administers SQL Server backend and develops SQL functions and stored procedures for data computations.
